Professional profile

Postgraduate in Psychology with a focus on game design and digital innovation, specialising in gamification, user experience, and digital innovation implementation. I have designed and tested interactive systems that balance player enjoyment with data validity and inclusivity. Experienced in running user studies with children and large public audiences, translating behavioural data and feedback into clear design decisions. Skilled in both quantitative analysis (three years of advanced statistics; Jamovi and SPSS) and qualitative research (thematic analysis).

Core Skills / Values presented

- Gamification & Engagement Design: Creating interactive tasks that boost participation and enjoyment.
- User Experience Testing: Collecting player feedback, analysing behaviour, and iterating designs for usability.
- Data Analysis: Proficient in advanced statistics and Jamovi for performance and behavioural data.
- Qualitative Research: Skilled in thematic analysis to identify patterns in user experiences.
- Behavioural Psychology Application: Applying cognitive, motivational, and perceptual principles to design.
- Digital Transformation - Ran reasoned digital transformation suggestions for public sectors.
- Event & Environment Coordination: Managing large-scale, time-sensitive setups and public engagement.
- Communication & Relationship Management: Adapting style for different audiences and age groups.

Education

University of Surrey, Guildford - *Postgraduate Degree* - September 2025 - PRESENT.

MSc Psychology in Game design and digital innovation:

Modules: Enhancing Engagement with gameful design, Extended reality, Psychology and game design, Writing gaming.

Experience: Gamification of educational learning, Developed VR environments in unreal engine for scientific purposes, Focus on developing and implementation digital technology.

University of Surrey, Guildford - *Undergraduate Degree* - September 2022 - June 2025.

BSc Psychology: Upper Second-Class 2:1 (68)

Dissertation (72) : Designed a gamified experimental task to investigate visuomotor adaptation in children with Developmental Coordination Disorder (DCD), ensuring engagement while maintaining data validity.

Key skills: Experimental design, gamification, advanced statistics, participant management, cognitive psychology

Ashmole Sixth Form, Southgate – A-Levels – September 2020 - July 2022

A-levels: Sociology (A*), Product design (A), Psychology (B).

Ashmole Academy, Southgate – GCSEs – September 2015 - July 2020

10 GCSEs, grades 7-9 including English, Mathematics, and Triple Science.

Experience

Innovation and Technology Lead (Game Jam), University of Surrey (October 2025 – February 2026)

- Led the implementation of new digital technologies across existing environments, to increase efficiency and reach.
- Assessed legacy systems and workflows to identify opportunities for digital improvement and automation.

Senior Student Ambassador, University of Surrey (Oct 2022 – Present)

- Delivered engaging campus tours and presentation to diverse audiences (100+ visitors per event)
- Adapted communication style to suit school groups, parents and prospective students
- Supported event delivery, ensuring smooth logistics and visitor satisfaction.

Logistics Team Member, Tottenham Hotspur Stadium (Jul 2022 – Present)

- Coordinated large-scale, high-pressure event setups and breakdowns, akin to preparing complex game environments or live events.
- Implemented safety protocols and managed resources efficiently for events exceeding 50,000 attendees.

Interests/Achievements

- Awarded partial scholarship for Gen.G practicum abroad relating to esports marketing and international collaboration.
- Passion for gaming, digital innovation and immersive technology, and how these systems can be implemented into existing environments.

- Active involvement in football, boxing, and rock climbing, demonstrating teamwork, discipline, and resilience.
